

Matthew Camp, M.D. Breast Lift After Care Instructions

While resting, keep your head and shoulders elevated on at least 2 pillows for the first 24 hours. You may get up to the bathroom with help only.

A light diet is best for the day of surgery. Begin by taking liquids slowly and progress to soups or jello. You may start a regular diet the next day.

If you have pain or discomfort, take the pain medication every 3-4 hours. It is best to take pain medication with crackers, jello, etc. If you have no pain, do not take the medication. Alcohol and pain medication should not be taken together.

For the first 48 hours keep your arm movements to a minimum. Your arms should not be used to support your body or to lift anything heavy.

Small drains may be used to draw off any accumulating fluid after surgery. The bulb should be kept collapsed at all times. The fluid will need to be removed from the bulb every 3 hours. Please keep a record of what time and how much fluid is emptied from the bulb. Bring this record with you to the office appointment.

Usually, drains are removed 48 hours after your surgery. The drains will not be removed if you have drained more than 30cc within a 24 hour period.

You will have skin tapes in place over your incisions after surgery. This will protect the incision for 7-10 days. You can shower with the tapes in place. If you have sutures above the skin, they will be removed in 7-10 days.

You may shower 12 hours after the drains have been removed.

You may wear a camisole but no underwire bra for 4-6 weeks.

It is important to be seen by Dr. Camp after your initial post-op checks. He will see you in follow-up appointments at 1 week, 3 weeks, 6 weeks, 6 months and 1 year post-op. We will make these appointments for you.

IF YOU HAVE ANY QUESTIONS, PLEASE CALL DR. CAMP

If you are a patient at one of the facilities below, please call between the hours of 8:30-5:00. If you need immediate care, please call Dr. Camp anytime on his cell.
